Education

University of Nottingham

MEng Hons Mechanical Engineering (1st class)

MEng Individual Project (1st) – Additive manufacturing of metal nanoparticles for flexible pressure sensors in artificial skins for prosthetics and soft robotics

Lawrence Sheriff School

BTEC: Level 3 Extended Certificate: Engineering (Distinction*)

A Levels: Mathematics (A*), Further mathematics (A*), Computer science (A), Physics (B)

AS Level: Additional further mathematics (A)

GCSE's: Further mathematics (A⁺), 4x (A*), 5x (A), 2x (B)

Employment History

Director at Precision And Research Technology Systems Limited 08/2021 - present

- Improved ROI by 30% through implementing a fraud-preventing process, and enforcement software system using C#, SQL Server, and RESTful APIs, for a 9-figure engineering development budget
- Decreased query execution time by 90% for a system accessed millions of times daily by optimising the SQL Server database schema and queries
- Optimised interdepartmental processes, software, and data systems to save tens of annual work units
- Designed an integrated e-commerce platform with custom ERP software for automated order management across multiple retail marketplaces and supplier networks using Python, Flask, and MySQL
- Executed rapid response to CrowdStrike incident to minimise downtime and profit loss
- Crafted interactive modules for monthly training of analysts on task automation using best practices
- Automated investment analysis with machine learning for market prices and AI for news sentiment

Software & systems engineer at 4 Shires Builders Merchants LLP 05/2019 – 09/2022

- Implemented TDD and CI/CD best practices and coding standards with Jenkins and Mocha and Chai
- Increased web presence by 2000% and visitor to sale conversion by 9000% with a new, containerised e-commerce site and social media marketing campaign
- Improved delivery rate by 20% and fuel efficiency by 30% by restructuring delivery logistics

Sales assistant at 4 Shires Builders Merchants LLP 06/2016 – 04/2019

- Cultivated longstanding business relationships and customer service satisfaction
- Analysed product and segment profitability, and opportunities for cross-selling and upselling
- Engineered storage systems and reorganised warehouse for over 60% greater stock capacity

GCSE-MSc STEM Tutor 03/2016 – 09/2021

- Adopted nuanced techniques for diverse personalities and learning styles

Work experience in Systems Analysis at Cummins Inc., Daventry 07/2016

- Programmed and presented a structural optimisation method for a steel I-beam crane boom

Technical Skills

Programming: bash, batch, C, C++, C#, CSS, HTML, Java, JavaScript, MariaDB, MATLAB, MS SQL Server, MySQL, OpenSCAD, PostgreSQL, Power FX, Power Query, Python, TypeScript, VB.NET, and VBA

Frameworks: ASP, Basilisk, Bootstrap, Chai, Django, ERPNext, Flask, Hugging Face, Jenkins, jQuery, Linq, Mocha, MVC, Node.js, Ollama, Qt, React, selenium, Sinon, tomcat, WooCommerce, and WordPress

Software: Dynamics 365, IntelliJ, LLMs (ChatGPT), Power Platform, Sage, SAP, Tableau, and Visual Studio

Cloud & DevOps: AWS, Azure, Docker, Git, Gitea, GitHub, Google Cloud, IIS, Kubernetes, and TFS

Languages: Fluent English, C1 braille and German and A2 French, Klingon, Mandarin, Russian, and Spanish
